

Easy to use whole grain Analyser

Fast and accurate whole grain analyser

The Inframatic 9500 is reliable and robust, built to meet the requirements of grain handling operations and analyses a wide range of grains and oilseeds or moisture, protein, oil and many other parameters in less than one minute.

Key features & benefits

- Accurate
- Reliability
- Rapid Analysis
- NIR networking
- Transferability
- Easy to use

The Inframatic 9500 is designed to be used at grain receivals and grain labs. This means that it can withstand harsh environments and rough handling, that it's easy to use, and that it has features that match the needs of grain labs.

The position and angle of the display can be adjusted to suit your needs. Move it up or down, back or forward, left or right, to optimize its position for the operator. Tilt it left, right, up or down to view the results from where it's most convenient.
